Any other suggestions/ observations, if any-

The program was very well organized and very informative. The speakers were very explained the topic very well.

The only drawback which I feel is the time of lectures. It was very hectic, we were very tired & drained with continued lectures.

(Name of the Participant)

S. RANJANI

Hands on training was the best experience to personally see the instruments and its working parameter.

Any other suggestions/ observations, if any-

Very good workshop with all the training sessions meeting the expectations. It was particularly useful to have the service engineers who could help us with many practical issues that we face. The workshop was well organized and the course contents were really beneficial.

I want to thank you, the whole team involved in the process of making this training programme so productive.

The content was extremely informative & incredibly useful. I have attended several trainings before but I can't recall any of them having such a strong impact. I will look forward to attending more training sessions with this CLIF, if possible.

Any other suggestions/ observations, if any-

More and more complex scenarios of analysis may be included precisely to each technician, which would be in great help for the users. To some extent speakers ~~are~~ managed to do that. ~~But~~ But for generality of the audience it would be better if you could include the special cases of analysis.

Any other suggestions/ observations, if any-

The overall training was upto the point. From speakers, teachers, faculty members and technical officers and helpers everyone was excellent. Everyone was hospitable and helped to every extent. Just a suggestion that rather than the theory, some speakers would have focused on experimentation and data handling and plotting the graphs & data.

Any other suggestions/ observations, if any-

The training program was good and informative. It would be more informative if some data analysis softwares were introduced with some hands on tutorials for example the Biostat analysis softwares, SPSS or SAS. The hands on training on these softwares is beneficial to researchers. The explanations of software terms, also and should be while doing the data analysis would be so helpful for understanding the softwares.
