Any other suggestions/ observations, if any-

① On the first day, there was no arrangement of drinking water in the guest house & also the rooms provided were dirty. Kindly ensure atleast the fundamental facilities are given for the non-localites atleast on the day when they have reached by travelling such a long distance.

② It will be far better if the theory session & the hands on training session on the same analytical technique is arranged on the same day. It will help in better understanding of the technique.

③ Some of the instruments were not at all in working condition & the reason of voltage fluctuation was given for it, which is totally absurd. Also, only overview of some of instruments were given on the name of hands on training, no sample run was there, which is very disappointing.

Any other suggestions/ observations, if any-

- Kindly focus more on hands on training < 60% of Programme.
- Before all the participants come here.. you need to check that all the Instrument are working properly or not!!!
- If there is a fluctuation of power then something needs to be done before the training program starts because Instruments should properly function during training.
- otherwise you organize it training program is Very well. Hence I am happy to Attend it 😊

Any other suggestions/ observations, if any-

- 1) Spectra development with software ~~#~~ is needed
- 2) One instrument has to be Explained in depth during training programme.
- 3) Overall DST-stuti-21 is excellent with small minor changes.
